**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal*

captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate. Removed/Destroyed only counts the removal or destruction of dens and burrows.

For Column 'IS / Non-IS': **IS** = Invasive Species; **Non-IS** = Not an Invasive Species

For Column 'States Involved': **DD** = Department of Defense overseas (primarily military aviation protection); **GB** = Guantanamo Bay

Invasive species in this report are highlighted. Each year, Wildlife Services manages damage caused by many invasive species.
