Comments:

Hello,

Thank you for allowing me to contribute. It's of my opinion that there should not be any additional wilderness lands created that disallow motorized recreation and specifically snowmobiling during the winter months. For that reason, please do not consider any options other than Alternative A or E.

The economic and social impacts of a closure of any land currently open, would be a major blow to the area and nearby communities. Tourists will no longer seek to vacation in your area and local use will be confined to a smaller area that will only cutie to negativity impact that area due to higher use film less area to spread out.

Please keep our public lands open and available for all to recreate not just the special interests.
