Comments:

To whom it may concern:

I believe the draft plan for the Wildernesses (Absaroka-Beartooth and Lee Metcalf) does not have much direction. The plan should prohibit all motorized and mechanized uses and also prohibit any activities that are not consistent with the protection of wilderness in order to preserve their wild quality. Vacant cattle grazing allotments in the Wildernesses should be closed. In the forest plan, no trail construction should be made in the areas that are without trails. The plan should put an end to destructive fish stocking when the lakes are naturally without fish.
