Comments:

I'm writing you in support of the Gallatin Forest Partnership agreement including the continued access for bikes to the Lionhead area and the Alternative E plan that would designate this as BCA, Backcountry Area. As a mountain biker I value access to wild and rugged places where I can test my mental and physical capabilities and also escape from modern amenities. I'm a fan of wild places and making sure they are available for future generations and the existing wildlife but I'm also a fan of being able to access those places by bike. Please continue to allow bicycles in recommended wilderness.

I appreciate your time and hope you recognize the needs and wants of all citizens who want to access our public lands and do it in a respectful manor to both wildlife and other users.

Anders
