Comments:

Alternative D of the Revised Draft Forest Plan is adequate, however the entire 230,000 wild, roadless acres of the Gallatin Range should be added as Recommend Wilderness in the final forest plan.

- Prohibit all motorized and mechanized uses

- the Absaroka-Beartooth and Lee Metcalf Wildernesses are not adequately managed. the Forest Service should reduce the permitted size of groups of people and horse/mule stock to the recommended numbers for wilderness management - not greater than 8 head of stock or 12 people. in addition, stop allowing fish stocking of naturally fishless lakes. Stocking fish in lakes leads to greater amounts of human feces in the area which washes into the water bodies, creating problems.
