Comments:

In reviewing the Custer Gallatin Forest plan, I believe there should be a much larger area for all of the various wildlife species. Additionally, allowing motorized atv's, etc. should be prohibited as the noise, damage to the land and the scaring of the wildlife is really unacceptable. I have seen an alternative plan D, that offers an unspoiled forest, more area for the wildlife - some 700,000 acres, an unspoiled land for all, and better utilization of our wildlife areas for all to enjoy.
