Forest Supervisor Custer/Gallatin National Forest:

March 22, 2019

This is in response to the draft Custer/Gallatin National Forest Plan.

I believe that future road building in the forest should be minimized. Roadless areas should be maintained as they now exist.

New wilderness should be recommended to Congress, certainly for the Hyalite Porcupine Buffalo Horn study area, and for all other roadless areas that meet Wilderness designation requirements.

Alternative D most closely represents my idea for this important forest as future development of southwest Montana grinds on.

Sincerely,

John J. Dolan
