Comments:

Strengthen Alternative D.

The best available scientific information supports strengthening alternative D with stronger standards for American bison.

Protecting American bison viability and increasing diversity should be a forest wide standard.

Freedom for American bison to roam National Forest habitat should be a forest wide standard.

Connectivity to habitat for American bison should be a forest wide standard.

The Custer Gallatin should initiate a habitat recovery program and provide funding to recruit scientists and biologists with aboriginal knowledge of American bison and fire.

American bison habitat recovery projects should be forest-funded and done in collaboration with scientists and biologists from American Indian Tribes with ancestral ties and treaty rights to the National Forest.
