Comments:

Hello Rodolfo, Roxanna reported to me after the panoramic pictures that student B was too close to her during the picture. She also stated that nothing was said to her and that she was not physically touched by the student. The panoramic picture was organized by the photographing team and students were placed according to heights. I told Roxanna that I would investigate and keep a log of the incident. After speaking with other students, teachers, and the admin team, and based on Roxanna's statement, we determined that I would log the information in illuminate, but that there was no evidence in which to make corrective action. I take bullying extremely serious and I have kept a very close eye on this current situation. I check in with Roxanna daily and have spoken with all of her teachers about the students interactions. All teachers, admin, and staff understand and do their best to monitor the students and minimize interactions between them. At this time, we will continue to monitor the students interactions and take corrective action when and if it is necessary. Thank you for your understanding, take care.
