Comments:

I would like to see a balanced use that (Alt B) that continues the access to allow for motorized 4x4 trails. I have two handicapped family members that only get to enjoy the forest from the passenger seat of our Jeep. One is Blind and they other had cancer and no longer has the use of her right leg. Jeeps allow them to go to remote places away from the crowds at camping grounds and trailheads. They can enjoy the forest as a family together. Keep the trails that are open, open! There are very few still open anyway, and the more you close them down, the more crowed and greater impact occurs on trails. Thanks for the consideration for my family!
