Comments:

I believe the wilderness recommendations in Alternative D of the Revised Draft Forest Plan are the best option.

In addition, I believe the Plan should also include the entire 230,000 acres of wild, roadless areas and not allow activities inconsistent with wilderness designation and protection, such as motorized and mechanized uses.

The plan should limit the size of groups (human and animals such as horses and mules) using the area to reduce impacts on the land, lakes and streams.
