Comments:

We are actually related to everything alive on this Planet and are interdependent even though religious beliefs deny it..Just recently,in the Philippines, students cannot graduate unless they each plant 10 trees. It should be the same in this country..Nature is in perfect harmony and balance and the only disturbing element is the Human animal, continues to reproduce mindlessly, causing the destruction of this planet's ecosystem..In the large ecological chain, ALL links are necessary for the survival of this planet, with one exception: The human animal, the most dangerous, destructive and therefore suicidal animal.
