Comments:

I am very concerned about the status of the Pryor mountains. My father and relatives were the original prospectors and mine developers for uranium starting in 1955. The first time for myself in the Pryor was December 1955 at the old glory claim. Since then I haven't missed but a handful of years going to the pryors. I apologize for the mess left by the mining including too many roads, discovery cuts and garbage. I think the only way to preserve this unique area is by wilderness designation. With the Yellowstone county population explosion and the introduction of four wheelers the human use of the area has gone up exponentially. Please leave the Pryors to future generations as a wilderness designated area. We all win. Thanks
