Comments:

I support recommendations in Article D of the revised draft Forest Plan which should be improved by adding the entire 230,000 acres of Gallatin Range. No vehicles of any sort should be allowed in there so to preserve the wildlife and wilderness.

The draft plan has little direction for Absavoka-Beartooth and Lee Metcalf Wilderness. Please reduce the size of groups going into this area so to protect this wilderness from danger and harm. And do not allow the issue of human and animal feces contaminate the lakes and streams. This is so important. Thank you.
