Comments:

Wilderness, by definition excludes motorized devices, and the Absaroka'Beartooth Wilderness can only benefit from this exclusion. The Natural Order of an ecosystem is dependent on negligible human effect; motorized vehicles bring noise, erosion, and othe man made effects, as well as numbers of humans that experience has shown are destructive to the Forest and included ecosystem.

In addition, maintenance of Natural Order in the Greater Yellowstone Ecosystem and continued existence will require very minimal human impact.

Therefore, AlternativeD is the most suitable and appropriates choice for management of these important areas.
