Forest Plan Revision Team

PO Box 130

Bozeman, MT 59718

Dear Revision Team,

I support the full incorporation of the Gallatin Forest Partnership (GFP) Agreement into the plan.... so alternative C which is closest to this.

I would like to see a balanced approach that does permanently protect certain wilderness and wilderness-like lands. With the increasing population on our earth and particularly around the region, more then ever we need to protect areas from motorized use that negatively impact other users by the noise, the damage, and the easy access to wild areas deep in the woods.

I have seen that motorized use often disregard signs and closures, thereby destroying the trails and changing their character. The motorized bike/ski mobiles now frequenting the woods in the winter, totally mess it up for cross country skiing, making a track that is too wide or too narrow to ski on. Bad. Keep these out.

Thank you for listening. I am a long-time user of the woods and have made my living there at different times in my life. Please keep them free from new motorized uses.

Thank you,

David King
