Comments:

Concerning the Revised Draft Forest Plan, I favor Alternative D but it needs to add the 230,000 wild, & roadless acres of the Gallatin Range as wilderness.

The globe is headed toward a 6th great extinction event, and local action is needed.

The draft plan should reduce group sizes entering the wilderness to protect the forest wildernesses from harm.

The plan needs to prohibit all motorized uses not consistent with wilderness protection to preserve those wilderness qualities.

Fish stocking in the naturally fishless wilderness lakes has become an ecological problem, changing the natural wilderness conditions, and also adding to the contamination of the lakes with feces, both human & pack animal.

Please do what is needed to add to and preserve the important Gallatin Range wilderness.
