Comments:

To Whom it May Concern, I have been riding my mountain bike in the Henry's Lake mountains for over a decade now. Specifically Mile Creek, Sheep creek and Coffin creek. I ask that you please do not take away my right to ride in these trails. I volunteer annually to repair the trails. As well, I hardly see anyone back there. I have a Fish and Wildlife degree from MSU and understand the ecology in this region and can not find reasoning behind closing this area to mountain bikes. West Yellowstone relies on out door enthusiasts to maintain their economy. Shutting this down will have a negative impact on the West Yellowstone economy. Myself on my mountain bike, does not negatively impact the wildlife or the experience of others. Every time I see a person on the trail, they are amused and enthusiastic. Then they ask if I have seen any Bears! Please let us continue to ride in the Henry's Lake Mountains. Sincerely, Chris Lohss
