Comments:

I'm writing in regards to the potential Buck ridge wilderness area. I am 200% against this proposal for a few reasons. 1) It would limit the amount of access to public hunting grounds that help control the population of elk in the already overly privatized Big Sky core. 2) Trail closures are becoming more common with the insert of out of state logic. By decreasing the amount of recreational areas it will lead to over crowding and ever more disconnect between outdoor enthusiast. The main goal of our past presidents and the forming of the Forest service was to keep open space that ALL could use, this goes directly against the founding core beliefs. Please reconsider these Wilderness areas and if needed place them in less used locations that don't hinder the enjoyment for the people of Gallatin County.
