Comments:

I wish to comment on the CGFPR #50185. Overall, I think that we should have more protection and designation for the Pryors. The road designations and Wilderness Study choices seen in Plan D are the closest to my ideas. The wild horse changes would be my least preferred choice. Making the Pryors protected from motorized vehicles and capable to allow hiking and walking to see the Indigenous artifacts, the Ice Caves, and the peak of the Pryors. The wildlife would be maintained and protected and would still be visible to the hiker.

More volunteer or ranger protection would be desirable to keep the public educated and respectful of the resources.

Thank you for your hard work in developing this plan.

David Myers
