Comments:

I am concerned about protecting our Wilderness Areas and the wildlife that lives withing them. I support the recommendations in Alternative D of the Revised Draft Forest Plan, but I support adding the 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan. I would like the plan to be changed to limit the number of people, or horses and mules, to only 12 per area. Please address the issue of feces in the wilderness areas, both human and animal, that is contaminating the rivers and lakes. To aid that, please end the fish stocking of naturally fishless wilderness lakes which will restore the natural conditions. To maintain the natural ecosystem of wilderness areas, please prohibit all motorized and mechanized uses, and any other activities that are not consistent with wilderness protection. It's important to protect our wilderness areas!
