Comments:

Our wilderness areas are treasures to preserve. Please include the whole Gallatin Range in the protections offered in Alternative D. This is a critical habitat for both the environment and wildlife. The plan should prohibit the use of mechanized and motorized vehicles. This is a WILDERNESS area and should be protected as such.

Also, please DO NOT allow large groups (up to 25) of livestock and people into the Absaroka-Beartooth and Lee Metcalf wildernesses, as both groups can be very destructive, Stock should be kept to eight and people to 12.

I also ask you to recognize and address the feces contamination by stock and pack animals as well as humans.
