Comments:

I write in support of Alternative D of the Revised Draft Forest Plan, but with the caveat that it must include the entire 230,000 undeveloped acres of the Gallatin Range as Recommended Wilderness. The plan should also do the following. (i) Prohibit all motorized vehicles and machinery. These are well-known to ruin a wilderness area. (ii) Reduce the group size limit to 8 head of stock and 12 people. Larger groups significantly damage wilderness quality. (iii) Develop a plan for dealing with human and pack animal feces contamination of streams and other waters. This is a courtesy to other wilderness users as well as prudent advice for the quality of the water. (iv) Do \*not\* stock mountain lakes that currently have no fish. Stocking would destroy the delicate ecosystems of these lakes. Thank you for your attention.
