Phone: 4064371800

Comments:

please opt for the most wilderness possible.... There is one thing that makes this place special = the outdoors.

With pressures of climate change, population, and consumption these areas will only get more rare. The wildlife they support have only you to help them.

No mining, motorised travel, or bike riding... only hiking. The rest of the state is "multiple use" We do not need to open up the last of our wild places!

Michael Sirr MD
