Comments:

Myself, along with dozens of other snowmobilers I know personally, travel west to ride several days each season. We spend a significant amount of money on lodging, gas, food, trail passes, etc. The areas proposed to be closed to motorized vehicles will greatly effect our riding areas and will cause us to ride in a different state. Closing areas will have a great impact on the economy for many small communities. Snowmobiling has virtually no impact on the environment because once the snow melts, there will be no traces remaining. Please highly consider keeping these public lands open for snowmobiles.

Thank you!
