Comments:

Alternative E will provide economic benefit to the state as more out of state are coming to Montana to use motorized recreation. These lands should be logged and thinned to aid in reducing the risks of major fires. Alternative A is the no change option. Why is there NO option to OPEN lands to motorized recreation? We value our land, our trails and wildlife. As our area continues to grow in population and popularity for motorized use by people coming from other states to enjoy our trails, why are the choices all about removing trails to be used by everyone? We cannot use trails until June 16 and/or July 16. Many of these trails are closed in September. That gives a window of opportunity of 6-10 weeks. Hyalite has SHARED use and are limited to a few days a week. The forest service needs to open more lands to be used by motorized recreation, and not continue to close lands. Open more lands please. Congress should release the WSA lands immediately.
