Comments:

I am submitting comments in support of strengthening Alternative D. I support setting strong standards to achieve viable, self-sustaining populations of American bison within the National Forest. I support listing the American bison as a species of conservation concern, reintroducing fire as a natural force in expanding habitat, removing barriers to migration, and securing habitat connectivity as critical to the preservation of our natural lands. These magnificent animals are one of the significant parts of our environment that we cannot allow to deteriorate. They must be allowed to be in their natural state and human predation and destructive incursions on their natural environment must cease. We do not need a theme park for buffalo.
