Comments:

There is not a single alternative that takes no action. There is also no alternative that increases access of motorized and mechanized uses. Every alternative results in closure of roads and further limits access. Page 89 of the DEIS. Objectives (FW-OBJ-RT) 03. All alternatives (B,C,D, and E) propose to close additional miles of road, no alternative was given to allow increased roads and access opportunities.

Page 94 of DEIS. Objectives (FW-OBJ)01. All Alternatives (B,C,D, and E) propose to "Remove or relocate existing recreation facilities including dispersed sites." The "specialist report" recommended expanding camping and recreation facilities however there was not alternative which would increase these opportunities. The Forest Service has failed to provide a "No Action" alternative, and they have failed to provide a "Preferred" alternative.

I am requesting that the Forest Service provide an actual "No Action" plan. I am also requesting that they provide a "Preferred" plan which would increase motorized and mechanized use as well as camping opportunities.
