Comments:

The "Custer Gallatin National Forest" is revising the agency's forest plan that will determine how American bison, and, their habitat, are managed for decades to come!

The 'Custer Gallatin' recently released a "Draft Environmental Impact Statement outlining a range of alternatives on American bison for public comment. (June 6, 2019 is the final day for commenting).

Our family is writing these comments in support of STRENGTHENING ALTERNATIVE D by setting strong standards to achieve the "desired condition" of viable, self-sustaining populations of American bison on the "National Forest"!

Listing American bison as "a species of conservation concern", reintroducing fire as a natural force in expanding habitat, removing barriers to migration, securing habitat connectivity, are samples of substantive comments for which we advocate!
