Comments:

I am in support of strengthening Alternative D by setting strong standards to achieve the "desired condition" of viable, self-sustaining populations of American bison on the Custer Gallatin National Forest.

Listing American bison as a species of conservation concern, in expanding habitat, removing barriers to migration, securing habitat connectivity. However I do NOT agree with re-introducing fires as a natural force in expanding habitat. There are many more environmentally friendly, less dangerous ways to implement. With wild fires globally, not the most brilliant idea to add to this already existing nightmare.
