

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please work on this as soon as you can.

Thank you,
Warren C. Whitehead
Retired Environmental Chemist (water)

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Warren Whitehead
Tucson, AZ 85741

Dear Custer Gallatin Forest Supervisor Erickson,

We need to keep our wild areas in this country. We need their ecosystems to help slow climate change. Also research in the last few years has indicated that nature and wild areas are good for human health. Yes, frequenting such areas may add to longevity and certainly to optimum health. We need good plans to have such areas live on into the generations.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

Please take a close look at independent, peer-reviewed science. Allowing the fox to tell you it isn't eating the chickens usually results in more dead chickens.

No more national socialist inspired appointees. No more appointees from the Criminal in the White House. This is a Time for Progress not a continuation of the same or regression. Time to impeach and fire d. trump. The creature is obviously unfit for the job. This is 2000s America not 1930s Germany.

Stop the attempted fascist takeover of America. Impeach, Charge, Convict and Imprison d trump and his cohorts.

Regards,
James K Hadcroft

I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Sallie Deans Lake
Northampton, MA 1060

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please manager Custer- Gallatin keeping in my the importance of protecting habitat for wildlife. As a hiker and nature enthusiast I seek out or national forests for the recreational opportunities they provide. I also sell them out for the wildlife viewing potential that is a pai of the nature experience. I urge you to strongly support wildlife and related habitat in the development of your forest management plan moving forward.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

I strongly endorse the idea of creating/sustaining as many roadless areas as possible to keep this fragile forest safe for wildlife. Keeping human intrusion to a minimum, especially the use of mechanized and motorized vehicles for recreation or other purposes, is the best way of ensuring the protection of sensitive species.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Custer Gallatin National Forest contains some of the wildest, most scenic, and ecologically-important lands in the lower 48. Iconic species like grizzly bears, wolves, bison, elk, and more migrate north from Yellowstone National Park to the Custer Gallatin's vast roadless areas.

It is also a landscape under threat, from climate change, human impacts, and hostile national policies that threaten all our public lands.

I strongly urge the US Forest Service to formulate a plan that keeps the Custer-Gallatin a true Wilderness.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

As a visitor to Custer-Gallatin National Forest and Yellowstone last spring, the interconnectedness of the ecosystem made it very clear to me that the proposed plan needs more work. The protections for grizzlies and other species in particular need to be strengthened because the habitat is so critical. The current plan does not adequately address what I saw on the ground as a visitor and as a retired ranger and outdoor recreation planner.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Linda Nicholes

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The animals were there first. They need our help to keep them on this earth. Do the right thing and protect them!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

My dad worked for the US Forest Service in several states. He taught me the importance not only of respecting the wildlife within but the forests themselves, something I've carried throughout my lifetime, and have tried to pass on to my daughter. So I'm speaking to you from this perspective. It is my sincere hope that your plan will put the health of the forests and wildlife that populate it first. That would be the responsible thing to do.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. This is nuts! We as people need to be there for these animals! They cannot speak or say anything on their part!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Lizzie Scott

Dear Custer Gallatin Forest Supervisor Erickson,

Preservation of our wild lands, including designated wilderness areas and roadless areas has become a serious issue as global warming causes damage to these areas. Pine bark beetles and wildfires threaten the ability of the global ecosystem to mitigate these problems. Trees are the most important land-based carbon sink. It is vital that these natural systems be protected. I urge you to consider this in drafting your plan.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Esterina Bodarky
Sumter, SC 29150

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

With climate change threatening everything, we need to preserve as many wild spaces as possible, especially those that have already been deemed precious.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

Reparation is a concept whose time has come: for Jews and other victims of the Holocaust, for South African victims of apartheid, for Native Americans ruthlessly displaced and/or murdered by the white man, for Blacks enslaved and abused in America.....now it's time for reparations to the hundreds of species Man has murdered, extirpated, displaced in his arrogant greedy rape of the planet's ecosystems. All threatened wildlife must be protected now, and guess what. I can't do that. Only you can.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Many people , through personal experience , understand the depth of all of God's creatures .

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Ken Lemaire

Dear Custer Gallatin Forest Supervisor Erickson,

It is extremely important that no changes that might have a negative impact on the ecosystem to the Custer-Gallatin National Forest. The wildlife that is there or migrates there deserve to have this area as a refuge for years to come. We need this area to stay as it is so future generations can see all the wildlife and forest as it's meant to be.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Roger Woodward
San Francisco, CA 94132

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please protect the wildlife and let them live in peace to raise their families!
Thank you for your support of them.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

This plan does not protect the roadless areas and wildlands of the Custer Gallatin Natl Forest for the many large animal species that need both as a refuge from increased human recreational use of Yellowstone.. A wilderness roadless area needs to be just that. Safe from roads which allow unnecessary human and even worse- motorized incursion into the wilderness areas. The proposed plan needs to be rewritten to keep this area wild and roadless

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

Wildlife doesn't know manmade boundaries and with our wildlife populations declining, these animals need all the protection they can get, and that includes their habitat. Without sufficient areas to roam, mate and forage, their numbers will continue on a downward curve. Coexistence is vital in this day and age and we must learn to respect what we have.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Sharon Carlson
Woodland Hills, CA 91364

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

We are here to save and protect the forests, public lands, wildlife, their habitats and waters. We will do whatever it takes to protect the wildlife and their habitats now and we will. We will continue to speak out against the way the government is not doing their jobs when it comes to protecting the environment and wildlife and their habitats now or ever. We have seen first hand how some of these animals have lost their homes because of greedy developers now and it is sick and cruel. We will continue to take action now and we will. We will continue to get justice for these animals and their habitats now and we will. We don't give up that easily anymore now and we won't. We will continue to fight back hard and strong when it comes to the environment and wildlife and their habitats now and we will. We won't let this go unnoticed now and we won't. We do blame the government for this now and we do. This is not over yet! We will continue to get to the bottom of this now and we will.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

Wilderness must be protected or it will be lost forever. Roads are a serious threat to wilderness areas and should be avoided. Wilderness is about preserving intact ecosystems and the animals that depend on them. These pristine areas should not be used for human recreation and access should be regulated.

Dear Custer Gallatin Forest Supervisor Erickson,

I live on the east side of the Sierra Nevada Mountains. We have wildlife, tourists and ranches. Periodically some group wants to spoil the land, animals, plants and entire ecosystems to benefit some human group. I want these beautiful areas in the USA to survive and be returned to the ecology they had before human settlement. This includes the bears, the wolves and any other species that benefit from the natural environment.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Michele Wilson

Dear Custer Gallatin Forest Supervisor Erickson,

Please protect roadless areas.
They are crucial for preserving local ecosystems.

Please remember that climate change will make life harder for all concerned.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The current illegitimate administration is greedy to the point of no return. People need wild places and wildlife. Many studies have shown that the most depressed people can heal after only three days spent in natural places. Wild beings and environment have taken a backseat to uncomprehensible greed. Greed is destroying so many people's lives and animals and environment suffer even more. Plans were in place to make wildlife corridors so they may roam free and safe. I support measures such as these. My personal situation has been loss of so many family members due to abuse. I am one of the people who greatly benefit from a hike where I can view wild beings and not disturb their environment. We need more access to wild places for the most impoverished people. It would aid their overall well being.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Lisa Alejandre

Dear Custer Gallatin Forest Supervisor Erickson,

Santa Barbara, CA 93101

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Shannon Gorton

Dear Custer Gallatin Forest Supervisor Erickson,

Custer-Gallatin National Forest
Plan Revision # 50185
Supervisor Mary Erickson

With due respects, Please do keep the Custer-gallatin Wild. Protect the beauty and the animals they are so unique and special. Keep the lands Natural as they were meant to be.

Let nature take its natural course, Simply natural special beauty in its own ways; protect it from . toxicity, drilling , destroying the animals, the trees, the beauty that belongs there and created by God and Nature . Natural lands ,ways and beauty should always be protected .

Truly,

Ms. Maria Celia Hernandez 5-22-2019

The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Diana Bowen

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The welfare of animals should be a major consideration in your plan!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Sheila Knerr

Dear Custer Gallatin Forest Supervisor Erickson,

As a wildlife and conservationist supporter I believe we need to respect and protect what few species we have left. We do not need to dominate and control every inch of land on this planet. We need to allow for wildlife to be wild and live in a manner they are supposed to, which is not controlled by humans.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

I'm sure you know the major portion of the comments was written by the Sierra Club & is highly technical. While I certainly am not that familiar with the situation I do trust the authors, the Sierra Club, what it stands for, its long, venerated reputation & its exemplary record acting on behalf of the environment & endangered species.

We humans have an absolute sacred duty to protect & cherish our home "the Earth" the environment & all living things, both plant & animal. Therefore, I must trust you to make the best choices based on those criteria. I urge you to take the advice offered in these suggestions.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

Dear Supervisor Erickson, If we need to keep wildlife in the Custer-Gallatin National Forest thriving then we can't fragment their habitat...so...the proposed plan for management of that parcel of land and the wildlife that live in it and migrate through it, is not acceptable. Please revise this inadequate plan so that biodiversity, soils and waters in this parcel are allowed to thrive rather than be stressed, divided, pounded and reduced in health. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape. Please err on the side of wilderness preservation rather than division by roads and four wheel drive tracks.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Ruth Ann Wiesenthal-Gold

Dear Custer Gallatin Forest Supervisor Erickson,

GOD gave us dominion over the animals to care for them. Not to harm them. Protect the wild places and all the creatures that live there.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

It is true that wildlife has a better ability than we do to fall into a balanced natural state, if we humans stay out of the way. We aren't that bright. Indeed, wildlife often can help us to remain in balance, too. We simply need to let them do this. We might even learn something. If you are drinking your coffee today out of a styrofoam cup, you know what I mean, since 1) styro causes cancer in some folks and 2) brain damage in others (depending on the person), and 3) never biodegrades. Only breaks into smaller and smaller particles to be ingested by animals and surprise of surprises - us! That we fail to eliminate styro from the production stream indicates our limits, one, by the way, which the natural world doesn't have unless imposed by us. So leave the Custer-Gallatin wild, and crap like styro out.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

It's hard to imagine gray wolves are under attack again. They are a keystone species and need to be protected. Do we really want the grizzly bear to become a rare species? One million species of plants and animals are becoming extinct and we are responsible. We are swiftly heading toward an uninhabitable planet. What will it take for Americans to wake up and realize what's been true all along. Earth doesn't need us but we sure need her to survive. Let's not ignore all the signs out there. We are the next species on the endangered list if we don't step up and protect all that we can right now. Please consider all that the Sierra Club is recommending.

Thank you for your attention.

I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Stacey Morelock

Dear Custer Gallatin Forest Supervisor Erickson,

Please keep Custer Gallatin wildlife-friendly.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Joanna Schwartz

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Custer Gallatin National Forest contains some of the wildest, most scenic, and ecologically-important lands in the lower 48. Iconic species like grizzly bears, wolves, bison, elk, and more migrate north from Yellowstone National Park to the Custer Gallatin's vast roadless areas.

It is also a landscape under threat, from climate change, human impacts, and hostile national policies that threaten all our public lands.

Please keep all rules and protections as they stand and add additional protections so that our wildlife will not just remain but THRIVE.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Clara Piecuch

Dear Custer Gallatin Forest Supervisor Erickson,

Let's leave some natural country to our children and grandchildren!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Dear Custer Gallatin Forest Supervisor Erickson,

Thank you for taking time to review this petition. Today it seems like everyone focus on making money not matter what. They do not see the bigger picture regarding the importance of protecting and saving our different environments, like keeping the CUSTER-Gallatin wild.

The way we manage our national resources/environment has direction impact on the animals, birds, insects, etc and on us (humans) and our water supplies. Thank you for your support.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

The US Forestry Service that is suppose to defend and protect the Eco System and Wildlife has a department called 'NRDC (Natural Resources Defense Council)' They're like a government kill team that targets wildlife ? and our tax dollars are keeping them in business.

Who are they? A little-known government agency called Wildlife Services. This rogue agency spends tens of millions of taxpayer funds to kill over 100,000 defenseless wild animals every year. And right now, they're getting away with it.

Wildlife Services are part of the Department of Agriculture that kills at the behest of big ranchers and agribusiness. Its stated mission is to "resolve conflicts with wildlife" by using poisons, traps, aerial gunning and other brutal methods.

Tragically, their operation has wiped out more than two million wild animals since 2000. Of those, more than 50,000 were killed accidentally, including endangered species and even household pets.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

Our attempt to protect these extraordinary places, to remain connected to this earth, is not only about the salvation of the planet but it is also about the salvation of ourselves.

The rights of the greedy few do NOT outweigh the rights of the many who deeply care about OUR Wildlife and OUR Environment. ENOUGH! We the people deserve better!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Tracey Bonner

Dear Custer Gallatin Forest Supervisor Erickson,

We have scientific data and long standing evidence of the damage that will be caused by allowing such an action to occur. One of the key roles of government is to preserve public safety. Willfully ignoring clear evidence of an impending catastrophe is a dereliction of duty. Scientists have worked for decades to assemble an incontrovertible body of evidence related to our changing climate, and ignoring that information is insidious. Future generations' resources, health and prosperity is dependent on us acting immediately, significantly and broadly.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

I just returned from a trip to Yellowstone and had an amazing experience viewing, bears, wolves, bison and other wildlife. It is imperative to protect all wildlife and expand the land area which will allow future generations to have the same experience I had. Hunting should not be allowed and if for no other reason, protecting wildlife will attract more people who want to view animals rather than cruelly and selfishly killing them.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Janice Martinek

Dear Custer Gallatin Forest Supervisor Erickson,

I join millions of Americans who share a concern for our wilderness areas. I ask that you highly consider wilderness preservation in your draft plan for the Custer Gallatin National Forest.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

Dear Custer Gallatin Forest Supervisor Erickson,

Dear Sir or Madam,

We the people may think that the bears, all animals that habitat in this area and nature do not have a voice. In some way true. Here is we the people MUST ask, beg and fight for them. But, I MUST add even though it may sound like I am contradicting myself, but YES....animals and nature have a LOUD voice when we as human being responsible for the protection of our lives and the future home of our children, their children and grandchildren in being Jeopardize BECAUSE we are hearing OUT-LOUD our environment is changing and many species are disappearing and our soils are being polluted for the sake of GREED without caring for the IMPACT and CONSEQUENCES. Humbly I am beginning the name of GOD and our future generation help protect Gallatin National Forest.

"The mountains are calling and I must go. In every walk with nature, one receives far more than he seeks. The clearest way into the Universe is through a forest wilderness.

John Muir

The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Mary Laughlin
Plantation, FL 33322

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please keep Custer-Gallatin wild. It is a beautiful place.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Al Roesch

Dear Custer Gallatin Forest Supervisor Erickson,

I support the recommendations of the Sierra Club for these areas. The Sierra Club's recommendations are a response to the dramatic loss of species we are experiencing, a loss which will have a serious negative impact on our own species if we do not take action to stop the decline. It is imperative that we start take no better care of the natural areas around us. These areas are habitat to countless species and must be preserved for the benefit of all who depend on them for survival.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

J Lukas

Dear Custer Gallatin Forest Supervisor Erickson,

I believe that it Henry David Thoreau who said "What good is a house without a planet to put it on."
Ecosystem protection must be included for all of the wildlife that we share this planet with.
We have no right to take away their homes. when we do, we take our home as well.
Protect the Custer Gallatin Forest for the wildlife.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Dear Custer Gallatin Forest Supervisor Erickson,

Though I have never been to Custer-Gallatin, it is imperative to the earth's future that we start doing a much better manager of the ecosystem and the environment. The goal must be to do as little damage as possible----thinking of the future at all times. Otherwise, no species will suffer worse than humans. That's how God created it.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

It is our duty to preserve our land and its animals for the next generation.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Malaiika Baxa
Madison, WI 53705

Dear Custer Gallatin Forest Supervisor Erickson,

All of our national parks and wilderness areas are under direct threat from inside of our country especially now with Trump in office simply because he does not care one whit about nature or habitats for animals. I think the Sierra Club's vision would absolutely be the very best way forward to keep the Custer Gallatin National Forest due to the many ideas to conserve it for our wildlife and for humans to enjoy and preserve for generations to come. I want to know these places will still exist for my grandchildren to learn and enjoy long after I'm gone and with the way our planet is rapidly changing, it's difficult to think they will. I'm disabled and old, but my grandchildren are young adults who enjoy nature and want it to be managed wisely for all concerned. Thank you.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Tim Holbert
Portland, OR 97215

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

What this country needs is more wild spaces, population is booming and we can't afford to develop pristine lands. Time to stop the rampant and unjustified development and allow these wild places to remain wild!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

There is so little wilderness left; it is our responsibility to preserve all that we can. Our nation has expended great effort and funding to preserve species that we ourselves nearly eradicated. All of that effort will be wasted if we do not continue to preserve the wild habitat that is left. Preserving wilderness serves the interests of all Americans in carrying out the purposes of our federal environmental laws mandated by our elected legislators and, as living beings dependent on diverse other living beings for our survival, it serves our interests in life itself. I endorse the Sierra Club proposal to preserve more wild areas in CGNF.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

Please be on the right side of history. The data makes it clear: we, as humans, need to be better about thoughtfully accounting for wildlife.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Cynthia Slavens
Alameda, CA 94501

Dear Custer Gallatin Forest Supervisor Erickson,

We can build a thousand skyscrapers.....new bridges, architectural miracles....but we cannot rebuild a natural environment that developed over a million years. Once these treasures are destroyed, they are simply gone. We do not get a "do over". We must protect them now, while we can, to ensure they are there for the future of our nation and for all the creatures that call those places home. Protect that forest!

I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Brenda Fink
Columbia, PA 17512

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Our wild heritage is critically important to us and future generations. Please save it.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

America benefits most from wilderness and wildlife management plans that allow our native species and forests to prosper. While most will never be able to enjoy the natural wonders in each and every national park, forest and monument, knowing that they will be alive and well in pristine, natural conditions is a gift we give to future generations. It is our responsibility as a nation to carefully nurture, maintain and protect our natural resources.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Michele Clark

Dear Custer Gallatin Forest Supervisor Erickson,

Protecting ecosystems should be at the forefront of any plans related to our national forests and other wilderness areas. In so doing, costs are lowered and sustainability for the long-term is strengthened along with the sheer majesty and beauty of these wild places. They deserve our efforts to protect them and offer them strong stewardship.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

Protecting our endangered wildlife should be part of your National Forest Supervisor role. Please take action today to assure that you and your team do everything necessary to provide a critical balance between the animals that should be able to roam safely and humans should respect this beautiful natural forest and act appropriately so as to not disturb the wildlife, but still enjoy the calm and serenity produced by these vast natural areas.

Your attention to this matter is critical and needs your focus. Please help!!

Thank you for reading this message.

I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Jose Soto Diaz

Dear Custer Gallatin Forest Supervisor Erickson,

Protect our parks - wildlife, non-invasive plants, and waters! No commercial profiting at our expense. Acknowledge and deal with climate change

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

Dear Custer Gallatin Forest Supervisor Erickson,

For human sanity, some land must remain wild. For the sake of wildlife, some land must remain wild. Remember the song: Pave Paradise, Put up a Parking Lot? Once it is gone, the world is a less better place. Think about future generations and this Country. Keep it wild.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

I support the strengthening Alternative D by setting strong standards to achieve the “desired condition” of viable, self-sustaining populations of American bison on the Custer Gallatin National Forest.

American bison should be listed as a species of conservation concern, reintroducing fire as a natural force in expanding habitat, removing barriers to migration and securing habitat connectivity are important in this draft plan.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club’s vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). Dear Custer Gallatin Forest Supervisor Erickson,

I have read the Sierra Club's recommendations for wilderness designation in the Custer-Gallatin National Forest and would like to add my voice to those requesting these additions to the current plan.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Jeannine Laverty

I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Virginia Bottorff

Dear Custer Gallatin Forest Supervisor Erickson,

Keep the Custer Gallatin Forest wild!! We need a better plan!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

Please manage this area by putting the forest and the animals that live there in the forefront of your decision making. The wildlife struggle with so much human encroachment they need a healthy and as little human contact as possible. Please keep the wildlife and the forest as your main reason when making a management plan on this important area. Sometimes, doing the right thing for wildlife doesn't include humans conveniences.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Mike Montes

Dear Custer Gallatin Forest Supervisor Erickson,

Please be the stewards of our natural resources and manage them wisely. Stewardship should be centered around conservation of those resources without consideration of profit margins for corporate interests. These lands are public lands that belong to all of us; think of future generations of children that will suffer from not knowing the beauty we will see today. Thanks and do the right thing, please.

Dear Custer Gallatin Forest Supervisor Erickson,

We need to do what we can to protect wildlife and the climate. There are species that are endangered and will be at even greater risk if their habitat is more restricted. We need to look to care for these areas and wildlife as humans have wreaked havoc on both already. We need to start doing our job to protect our future.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

All these areas must be managed responsibly in order to facilitate the continued existence of the animals, plants, trees, fish in these most precious wild areas. We must take our job as the stewards of God's creation seriously and be respectful of all he has created and not negatively impact his creation. We must make adjustments to combat climate change and reduce our carbon footprint. Without these wild areas we will be lost as we will lose our humanity. Please follow and recommend this guide to maintain the Custer Gallatin Forest and all its wildlife and its very important ecosystem.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. Dear Custer Gallatin Forest Supervisor Erickson,

My father retired from the National Park Service, and I grew up in Yellowstone Park (among others). I urge that the Custer Gallatin Forest Plan include safeguard wildlife in the area and the impact of human encroachment on habitat. We know wildlife are not tied to one area only and this area is tied to Yellowstone through wildlife migration back and forth. Please consider climate change, loss of habitat and other critical issues facing this area in the coming years.

Thank you,
Carolyn Morado

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

addie Campaigne

Dear Custer Gallatin Forest Supervisor Erickson,

Viewing wildlife and public outdoor recreation is very important to me. Please protect our public places as the more natural we can keep places like the Custer-Gallatin National Forest better it is for the country now and future generations.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please allow the roadless areas to remain wild!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Cynthia Young
Gibsonia, PA 15044

The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

S Grenzow

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

If your plan for any wildlife habitat in the American experiences does not include the saving of the habitats for the long term survival of the creatures therein I would revise it immediately. Wild habitat is nothing without those animals who live and survive there.

Thank you,

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Buzz Alpert

Dear Custer Gallatin Forest Supervisor Erickson,

I am an attorney in Washington State and I am a former chairperson of the Washington State Bar Association's Animal Law Section. My comments are my own and do not represent the views of either the Bar Association or the Animal Law Section. I am concerned because I see that the National Forest Service is working for big business interests and NOT for those of us who are average Americans. It's time to stop ignoring science and the American public and make a plan that does not pander to big business interests. I urge you to STOP ignoring what is best for nature.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy’s Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan’s recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Ann Downey

Dear Custer Gallatin Forest Supervisor Erickson,

Please allow our grandchildren to enjoy the beauty in nature that we have had. Once it's gone, we will never get it back.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). Dear Custer Gallatin Forest Supervisor Erickson,

We need to take care of and increase our forests and public lands. We need to take care of these wild places which all need some much need attention. Please work on the best plan for the land and the wildlife so that they will be there for future generations. Do not allow corporations to rape our forests, lands and wildlife.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Diane Vandiver
Bolingbrook, IL 60440

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please help to strengthen the draft plan by increasing the areas designates as wilderness. The Custer Gallatin National Forest has some of the most beautiful and ecologically important wilderness area in our country. It is important habitat for some of our remaining wildlife, including grizzlies, wolves, elk, and bison just to name a few. Please strengthen the protections of this national treasure. Thank you for your consideration.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Dear Custer Gallatin Forest Supervisor Erickson,

Protecting the wild life of America is a critical part of our national identity.
Animals at the top of the food chain play an essential role in the maintenance of
a health eco system.
We and our children deserve a future with thriving wild places.
Please KEEP THE CUSTER-GALLATIN WILD---make a better plan.
Thank-you for your consideration,
Sandra Pascal

Dear Custer Gallatin Forest Supervisor Erickson,

Perhaps the most endangered portions of our wildlands are wildlife corridors and roadless areas. Please consider both of these and realize that any development in the Custer-Gallatin National Forest not only degrades the area, but can never be restored once compromised.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

NOW IS THE TIME to step up, while the current corrupt administration can only look at ways to step down from being responsible for what other Presidents and, by extension, the forest service officials have established and supported. It is crucial that the Custer-Gallatin habitat past thoughtfully developed plan be maintained for wild animals and humans beyond this generation to enjoy.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

As a citizen, taxpayer and small business owner, I ardently support protecting national public lands and the wildlife dependent on them. As an environmental health scientist, I know that Nature and wildlife are important to humans for both mental and physical health. Additionally the other species that inhabit the Earth with humans are important in their own right and deserve to be protected. Please keep the Custer Gallatin wild. Do not sell it off to the highest bidder, protect and maintain it.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

PLEASE CONSIDER WHO'S LAND THIS WAS FIRST, THE ANIMALS !!!! THEY ARE THE NATIVES ,MAN IS THE DESTROYING FORCE OF WHAT WAS ONCE PRISTINE AND GOOD !!! PLEASE KEEP THESE LANDS WILD !!! WE ALREADY HAVE A SEVERE SHORTAGE OF MAN POWER TO PROTECT AND MANAGE OUR NATIONAL AND STATE PARKS AND SO TOO FEW DOLLARS TO PAY THESE DEDICATED FEW. !!! THANK YOU ALL WHO CARE FOR OUR BELOVED CREATURES !!!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Marla Matters
Montrose, CO 81401

Dear Custer Gallatin Forest Supervisor Erickson,

We must protect our wild and scenic places in America, while we still have the chance. There isn't a lot of land that's still wild, please save the wildness we do have.

Thank you.

Dear Custer Gallatin Forest Supervisor Erickson,

The way things are going, we will end up with a planet with nothing but people and cattle on it. I urge you to do everything you can to prevent this. Personally, I am eating less beef, considering packaging when I purchase, walking instead of driving. I am not alone in trying to clean up our mess, and make room for other species. Please take another look at the Sierra Club's vision for this area.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

As a young family of 4, we thoroughly enjoy the outdoors and all its wildlife roaming in their natural habitat. That is why we are signing this petition: to urge you to “keep it wild” and let there be roadless areas for our wildlife to continue to roam freely. We all need to co-exist together. I am a voice of the wildlife since they don’t have a voice of their own (just call me The Lorax!) and I urge you to let the animals roam freely.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club’s vision for recommended wilderness in the Custer Gallatin.

I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Jimmie Oneal
Meadow Valley, CA 95956

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

A better plan that better protect the land and wildlife must be put forth. The animals and land cannot speak for themselves so we must do it for them and do the best we can do to protect them.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Susan O'Rourke
St. Petersburg, FL 33710

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Protecting the wildlife in our National Forests MUST be the top priority for the lands held in trust for all Americans.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Mary Bonner

Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Mary Popiel
Norwood, PA 19074

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

It is important to think long term to ensure the best decision for future generations. It is necessary to enact a plan that shows good stewardship of our plants and wildlife. Please put America first. It must be right.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Brenda Campbell
Bath, MI 48808

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Who was here first? Answer : Wildlife. Wild spaces and wild life matter. I demand you keep our wild places WILD.

Wild spaces define who we are as Americans. It is our job to continue to defend them from being scarred forever.

The Custer Gallatin National Forest contains some of the wildest, most scenic, and ecologically-important lands in the lower 48. Iconic species like grizzly bears, wolves, bison, elk, and more migrate north from Yellowstone National Park to the Custer Gallatin's vast roadless areas. Fight to keep it this way.

KEEP THE CUSTER-GALLATIN WILD FOREVER -- MAKE A BETTER PLAN!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

Dear Custer Gallatin Forest Supervisor Erickson,

I am an avid outdoor enthusiast who enjoys mountaineering, backpacking and climbing. I have hiked the Tetons many times as well as the Colorado Rockies. Preservation and conservation are vital to keeping our wilderness healthy and vibrant. Wildlife preservation is a key component of these efforts - particularly as apex predators, the bear and wolf populations need to be protected and safe and responsible harvesting policies need to be developed and strictly enforced.

Joe Lanzetta

Bear and wolves are a v

I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Martin Segal

Dear Custer Gallatin Forest Supervisor Erickson,

PROTECT Custer-Gallatin!

WE ONLY GET ONE SHOT!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

Dear Custer Gallatin Forest Supervisor Erickson,

Please leave one of the last pristine, basically untouched wild places left in the U.S. alone to thrive as it would naturally. The current administration in Washington D.C. is trying it's level best to destroy as much of the environment and wildlife as possible. Please leave our public/protected lands alone. Enough is enough.

I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Meggan And Emily Ryan
Canoga Park, CA 91304

Dear Custer Gallatin Forest Supervisor Erickson,

Protect nature for our children and future generations... It is our duty!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. Dear Custer Gallatin Forest Supervisor Erickson,

As a Rural American I understand respectful, responsible stewardship with wildlife and unique habitats.

As our public servant employees, the US Forest Service must honor and prioritize diverse, natural environments and their inhabitants. Priority over the private individual and industry profits, gains, interests and concerns, frequently focused on short term and single-minded goals.

Please keep the Custer-Gallatin wild. Create a better, thoughtful plan that as it's core priority, fosters the long term health and safety of it's mostly silent dwellers and their critical ecosystems.

With appreciation of your time and thoughtful consideration of this concern that will touch and influence present and future generations of two and four leggeds.

Every good intention.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Betsy Mooney
Santa Barbara, CA 93111

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

To all of you at the Custer-Gallatin Wild I would like to tell you how important I think it is to keep it as wild as is possible for the sake of the animals there. I'm not saying that mankind should not be able to enter it, but they should not be able to bring cars or motor cycles into it. Hiking is ok with me, or bicycling also, but no snowmobiles.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

Thank you for considering this petition from Sierra Club members and supporters. Please incorporate these measures in the management plan you are developing. I understand the pressures to make every acre of creation conform to the desires of people "right now" but our whims of the moment should not and can not always dominate. Once wilderness and all that lives therein is gone it is gone; lost to future humanity. We are the stewards of God's creation, please do all that you can do to protect this forest. Thank you.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. These creators belong to this earth just like us. You will greatly impact the echo system without them. We have seen countless times the wolves have been remove with great impact. We need to preserve have we not learn from the past of our mistakes.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Deborah Sterling

Dear Custer Gallatin Forest Supervisor Erickson,

I am a retired wildlife manager for the state of New Mexico. I was educated under the philosophy of Aldo Leopold.. " You need to keep all the parts"

Bears, Lions, Wolves, are all "parts" of a healthy ecosystem.

Maintaining a healthy ecosystem comes before biopolitics, bioeconomics.

Dear Custer Gallatin Forest Supervisor Erickson,

Mary, please hold this thought as you think about the best way to manage what is left in and of the Custer-Gallatin National Forest...and all of our national forests. The days of unexplored and unlimited wilderness in our country is long past. The days of a young developing country with seemingly unlimited natural resources and a need to take maximum advantage of those resources for the national good has also past. We now need to shift into a plan that protects and preserves what little of that undeveloped and unspoiled land and native wildlife remains...for the PUBLIC good, for OURSELVES and our children and future generations, to see and experience... with all its old growth trees, native plants and sustainable populations of native animals, clean air and water...and which is unspoiled and unpolluted by commercial and/or private exploitation for private short term economic gain and fleeting profits.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Michele Tornabene

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Please do all you can to protect our wild places under your supervision. You are the front line of defense, and we are all counting on you.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Cal Cole

Dear Custer Gallatin Forest Supervisor Erickson,

It is essential for us to keep forest land and other natural lands as they are. If not, we are not only destroying our planet, we are contributing to climate change. Please revise the Custer Gallatin Forest Plan Revision # 50185 to include such protection. Thank you

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Custer-Gallatin National Forest is an area that essential for all the wildlife that lives there and should be protected at all costs. This draft falls short of a comprehensive wildlife habitat protection plan. Our wildlife is being attacked from all sides with the threats climate change bring and the total lack of interest from the current administration toward protecting any animal or plant species. This draft plan needs to be stronger in protections for the wildlife in the C-G National Forest.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Lori Andrews
Tallahassee, FL 32305

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

thanks

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Forest Supervisor, Mary Erickson
Custer Gallatin National Forest
10 E Babcock Ave
Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

Besides the other recommendations, I also believe that the CDT and the divide itself should be protected from motorized and mechanized use at least a mile on either side of the divide. A migrations corridor along the continental divide and any other areas used by wildlife for migration should be protected from development and the above described uses.

I also would like to see the entire unroaded Gallatin range protected from development and mechanized abuse.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Forest Service is responsible for protecting not only our forests but the wildlife that inhabits them. When you permit forest destruction, you also destroy wildlife habitat. There's no need to be reckless and mean just to enrich a few already rich men.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

John Myers

Dear Custer Gallatin Forest Supervisor Erickson,

This has become vital with current changes.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. Dear Custer Gallatin Forest Supervisor Erickson,

Each of us has a very short tenure on this planet, but the planet must go on to care for all the future generations of people and animals. Humans should not dominate this planet, it is a shared planet of many wonderful lifeforms. Since humans cause the damage, they must put the protections in place, and those protections should not be solely, or even mostly about humans, but rather, about our entire planet and all of her inhabitants. We need more animals, more wild lands, more natural beauty.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Dear Custer Gallatin Forest Supervisor Erickson,

I bring to your attention this quote that should be a warning to us in the 21st century with the world on the brink of ecological collapse:

"Man must be made conscious of his origin as a child of Nature. Brought into right relationship with the wilderness he would see that he was not a separate entity endowed with a divine right to subdue his fellow creatures and destroy the common heritage, but rather an integral part of a harmonious whole. He would see that his appropriation of earth's resources beyond his personal needs would only bring imbalance and beget ultimate loss and poverty for all." - by Linnie Marsh Wolfe, describing John Muir's remedy for human misery in her book, *Son of the Wilderness: The Life of John Muir* (1945) page 188.

We do now face ultimate loss. We must preserve all we can of what is left.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

William Hermann

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

We need to protect all the wild space we have left, while we still have wilds to set aside. Please consider all perspectives when making a plan for the Custer-Gallatin National Forest, and set a path for preserving this space as fully and securely as possible! Thank you for your consideration.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Dear Custer Gallatin Forest Supervisor Erickson,

Please you must do everything you can to ensure our wildlife and the habitat they need for survival is cared for and protected. Our wildlife is already struggling to survive the devastating effects of climate change. We must do everything we can to help them and nothing that will further burden them. We must give them every chance not only to survive but thrive as our planet becomes more Dangerous and difficult for all living things. We will not get another chance to make the right decision.

Dear Custer Gallatin Forest Supervisor Erickson,

I have lived near the Mark Twain National Forest, the Ozark National Scenic Riverways, as well as the Buffalo National River. I have witnessed firsthand the importance of wild areas for the maintenance of healthy populations of wildlife species. Elk have been introduced to the Upper District of the Buffalo River, and have proven to be a huge tourist attraction and a boon to the local economy. I believe that restocking bison could have the same effect.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Timothy Gilmore

Dear Custer Gallatin Forest Supervisor Erickson,

These wild areas need to be preserved not only for the wildlife but for us and future generations. Thank you!

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Sierra Club's recommendations to the Custer Gallatin draft plan are so well thought out, so well seen and so crucial. Thank God someone is looking at the ways in which wildlife can get from one area to the next, keeping wilderness links intact. Keeping wilderness wild, keeping it protected and intact with no loopholes, keeping any and all motorized vehicles out, keeping it totally wild is the most important legislation you will ever do. Please adopt these recommendations and make a better plan! Thank you, Best Wishes

I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Jim Thomas
Chapel Hill, NC 27514

Dear Custer Gallatin Forest Supervisor Erickson,

We need a plan that protects grizzly bears, gray wolves, and all wildlife that has access to Yellowstone National Park and the roadless areas of Custer-Gallatin National Forest.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Frances Recca

Dear Custer Gallatin Forest Supervisor Erickson,

Our wild spaces are a national treasure that are far more important than any other use could possibly be.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. Dear Custer Gallatin Forest Supervisor Erickson,

Every natural place remaining seems to be in danger of being ruined by depriving wildlife inhabitants of their home. Killing nature means death to humans as well. It's almost too late, so as a species we must absolutely wake up and protect our home. This planet and nature are our home, too! Can we learn from the native peoples and from the animals themselves? If not, we are gone.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF. I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Debra Weninger

Dear Custer Gallatin Forest Supervisor Erickson,

The time to act is now. If plan is not initiated at this time, the risk of further delays and significant habitat loss cannot be overstated.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Dear Custer Gallatin Forest Supervisor Erickson,

The Grizzly bears who migrate into the Custer-Gallatin area should not be impeded from their natural way of life by the Plan Revision made for that area. These creatures cannot be replaced and must be protected in this regard.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.

Specifically, I would like to see two roadless areas in the northern Bridgers around Blacktail and North Cottonwood recommended for wilderness. I would like three roadless areas within the Crazies to be recommended for wilderness (significant areas of polygons 36, 37 and roadless area between these). The forest plan should recommend a significant portion of the Gallatin Range for wilderness, including the exceptional wildlife habitat in the Porcupine-Buffalo Horn area, South Cottonwood, Hidden Lakes, and West Pine.

In the Absaroka-Beartooths, several drainages adjacent to existing wilderness are also worthy of wilderness recommendation including Line Creek, West Fork/Lake Fork of Rock Creek, Mill Creek, East Rosebud, and Main Fork Rock Creek. In the Madisons, the area south of the Taylor Hilgard Wilderness Unit should be recommended for wilderness designation. Cowboy's Heaven should be recommended for wilderness due to the important wildlife linkage it provides to portions of the Lee Metcalf Wilderness. I support the previous forest plan's recommendation of nearly 23,000 acres of wilderness in the Lionhead. Large portions of the Pryors roadless areas including Big Pryor, the Punchbowl, Lost Water Canyon, and Bear Canyon should be recommended for wilderness. I want recommended wilderness to be managed in the same way as designated Wilderness, excluding mechanized and motorized recreation to preserve the wild character of the landscape.

The management plan should facilitate the return of bison to their historic range and allow them to move freely through their native habitat, with the goal of a year round self-sustaining bison population in the CGNF. I support the designation of the 30 eligible wild and scenic rivers as a key component of protecting riparian ecosystems of the CGNF.

I believe that these wilderness and wild and scenic recommendations are necessary because this forest will face tremendous challenges in coming years. The rapidly increasing population of Gallatin county and climate change will significantly impact the CGNF. The revision of this forest plan is our best opportunity to protect this incredible ecosystem. The management of this forest should lean towards wilderness preservation because I fear if we do not act now, we will not get a second chance.

Sincerely,

Nancy Nolen

Dear Custer Gallatin Forest Supervisor Erickson,

It is our responsibility and should be our privilege to protect and preserve our wild areas and the amazing creatures that call them home. Please take the higher ethical road and do all you can to respect our planet and the jewels we enjoy.

Bozeman, MT 59771

Dear Custer Gallatin Forest Supervisor Erickson,

The Custer Gallatin National Forest contains some of the wildest, most scenic, and ecologically-important lands in the lower 48. Iconic species like grizzly bears, wolves, bison, elk, and more migrate north from Yellowstone National Park to the Custer Gallatin's vast roadless areas.

It is also a landscape under threat from climate change, human impacts, and hostile national policies that threaten all our public lands.

Right now, the Forest Service is developing a new management plan for the Custer Gallatin. The new plan, once finalized, will guide management of the forest for decades to come. This plan needs key protections for important wildlands and roadless areas to be the necessary best plan possible.

Thank you for the opportunity to comment on the draft plan for the Custer Gallatin. While I recognize the hard work that has gone into this draft plan, I believe that the best way forward for the Custer Gallatin National Forest (CGNF) is not contained within a single alternative. I support the Sierra Club's vision for recommended wilderness in the Custer Gallatin.
